ISTRUZIONI PER L'USO

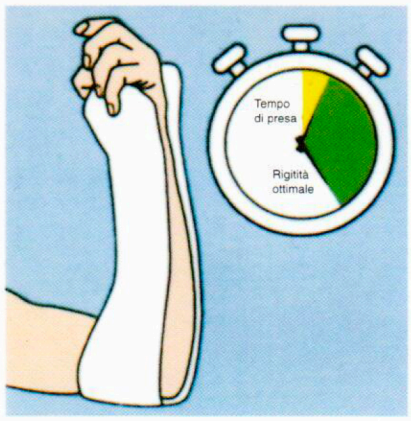

① Immergere lo **SPLINT** nell'acqua a temperatura ambiente (20-22°C) per 8-10 secondi.

② Togliere lo **SPLINT** dall'acqua e strizzare con forza. Eliminare eventuale umidità dalla parte spugnosa distendendo lo **SPLINT** su un piano assorbente

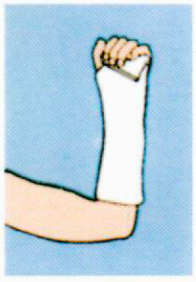

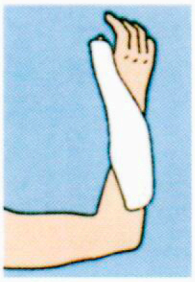

③ Applicare lo **SPLINT** all'arto, posizinando lo strato spugnoso a contatto con la pelle. Fasciare con una benda elastica modellando anatomicamente.

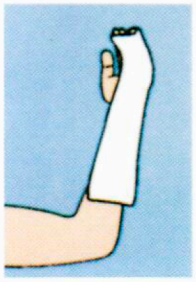

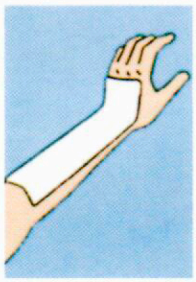

④ Il tempo di presa va dai 2 ai 3 minuti. Raggiungerà la rigidità ottimale in 20 minuti.

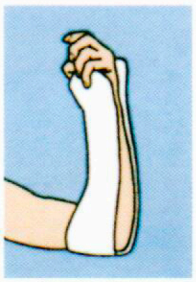

APPLICAZIONI (tipi di immobilitazioni)

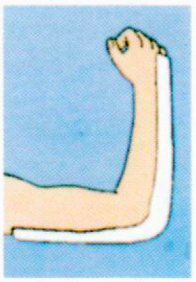

palmo

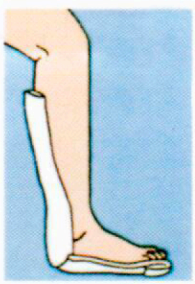

pollice

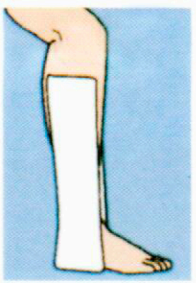

mano

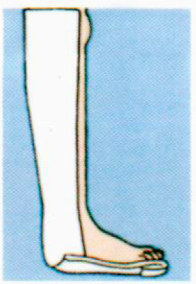

dorso

a pinza

gomito

posteriore della caviglia

a staffa

ginocchio e gamba
